PROFILE SUMMARY

Experienced Full Stack Developer with a strong background in both front-end and back-end development. Proficient in Python, Flask, MongoDB, and Node.js for backend development, and highly skilled in React.js, SvelteKit, and Next.js for frontend frameworks. Extensive experience in JavaScript development, building dynamic, high-performance web applications with a focus on scalability and efficiency.

Expert in designing and developing RESTful APIs, optimizing database performance, and implementing MicroFrontend architectures to create modular and scalable applications. Adept at crafting visually appealing, interactive user interfaces using Bootstrap, TailwindCSS, and D3.js, ensuring seamless user experiences.

Passionate about leveraging both server-side and client-side technologies to develop innovative, high-quality solutions. Committed to delivering performance-optimized applications with a strong emphasis on usability, maintainability, and cutting-edge web development best practices.

PROJECTS

Pinaca Technologies
Apr 2024 - Present

Maharashtra Advanced Research and Vigilance for Enforcement of Reformed Laws (MARVEL)

Role : Full Stack Developer

- Contributed to the development of the MARVEL project, focusing on creating an efficient and user-friendly interface.
- Utilized SvelteKit, React.js, and JavaScript for building dynamic and responsive frontend components.
- Employed Bootstrap and TailwindCSS to design attractive, functional, and consistent UI layouts.
- Leveraged Node.js to optimise backend functionality and improve the overall application performance.

AshXpert
Nov 2024 - Feb 2025

Web Application Development for AshXpert

Role : Full Stack Developer (freelancer)

- Developed a robust and scalable online web application using modern web technologies.
- Designed a high-performance and responsive frontend with SvelteKit.
- Implemented an efficient backend using Flask and Python for API handling and business logic.
- Integrated MongoDB for seamless data management, ensuring flexibility and scalability.
- Utilized JavaScript and Node.js to enhance server-side and client-side interactions.

- Worked as a Full Stack Developer on the Thunderbolt project, delivering end-to-end solutions.
- Developed the backend using Python, Flask, and MongoDB to create scalable and efficient APIs.
- Built the frontend with SvelteKit and Bootstrap, ensuring a responsive and visually appealing user interface.
- Leveraged JavaScript and Node.js for server-side logic and improved application performance.
- Integrated backend and frontend seamlessly, utilizing Node.js for smooth API handling and JavaScript for dynamic, interactive frontend features, to provide a smooth and functional user experience.
